

## Jeonju Experience Program II for ISAAC 2014 Korean Traditional Handicraft Experience

[Hanji](#)(韓紙) is the name of Korean traditional paper. Hanji is made from natural ingredients like the bark of the paper mulberry. It has been used in Korea for centuries. In the past it was used to make books and to cover windows and doors. Hanji is so durable that layered Hanji was even used as armor protecting from arrows.

Nowadays, Hanji is used mostly for decorative purposes such as making dolls, wrapping paper, decorative boxes, and other handicrafts.

We are pleased to offer you a real experience of making a hand mirror which is one of the handicrafts using Hanji. It is of practical use in many ways and can be a meaningful gift for your friends and family.
